

Product Description

Bluetooth Smart LED Bulb

Bluetooth Smart LED Bulb is an energy-efficient lighting solution that combines LED technology with Bluetooth wireless connectivity. Designed for modern smart homes and commercial spaces, Bluetooth smart light bulb can be operated wirelessly via smartphones, tablets, or other Bluetooth-enabled device without requiring a Wi-Fi network or hub connection.

Advantage

- Bluetooth Connectivity

Todaybulb's Bluetooth smart light bulb is easily paired with your mobile device through a Bluetooth connection via a dedicated app.

- Remote control

Todaybulb's Bluetooth color changing LED light bulb turns the light on/off, dim it, or change its color (RGB models) from your device within Bluetooth range.

- Dimming & Scheduling

Todaybulb's Bluetooth color changing LED light bulb can adjust brightness levels and set timers or schedules to automate lighting.

- RGB Color

Todaybulb's Bluetooth color light bulb is RGB with millions of colors to set the mood or match your decor.

- Voice Control (compatible models)

Todaybulb's Bluetooth color light bulb has some models supporting integration with voice assistants by a specific hub connection.

- Energy efficient

Todaybulb's Bluetooth multi-color light bulb utilizes LED technology to ensure low power consumption and long lifespan.

- No hub or WiFi required

Todaybulb's Bluetooth multi-color light bulb normally connects directly to your phone via Bluetooth, ideal for areas with limited space or no Wi-Fi & hub system.

Bluetooth Smart LED Bulb

Feature

- ✓ Bluetooth connection
- ✓ RGB colors changing
- ✓ Group function
- ✓ App control
- ✓ Dimming
- ✓ No WiFi network or hub required

Application

Bluetooth controlled light bulbs offer versatile lighting solutions across various environments. With wireless control, energy efficiency, and customized features, they are perfect for pendant light fixture, floor and table lamp, ceiling light, which are ideal for both residential and commercial applications.

Residential Lighting

- Bluetooth smart light bulb can adjust color temperature, brightness and timer setting to meet different scenarios at home, like sleeping, learning, and dining.

Commercial Spaces

- Bluetooth color light bulb is CCT dimming, dynamic colors changing, and scene setting to match operating hours for restaurant and cafes. And no wiring required, easily to replace traditional light bulbs.

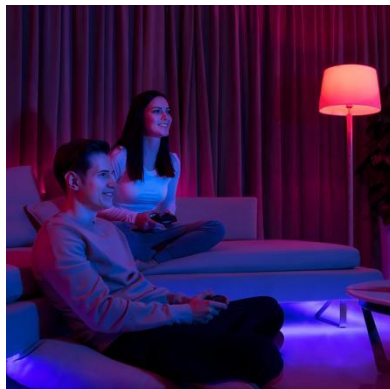

Holiday & Party Decoration

- Bluetooth controlled light bulbs can be networked to synchronize color changing in holiday and party, quickly to create a happy atmosphere instead of LED string light which takes higher cost and more time.
