

Product Description

C7 LED multicolor christmas lights

C7 LED multicolor christmas lights feature a signature conical design, consist of PC cover, LED filament and E12 base. C7 colored christmas lights have a diameter of approximately 23 millimeters and a height of 55 millimeters. C7 led christmas lights outdoor are more compact than C9 lights and more eye-catching than C6 lights, making them suitable for decorative needs where a sense of refinement is pursued. Super bright led C7 bulbs are a versatile lighting product widely used in fields such as holiday decorations, commercial lighting, and outdoor activities.

Advantage

- Energy saving

A single C7 LED light only consumes about 0.5W of power, but C7 colored christmas lights' brightness can rival that of a traditional 5W incandescent bulb. You can save up to 90% on your electricity bill in the long run.

- Diversity

In addition to the common warm white (2900K), there is also an RGB color version, C7 led christmas lights outdoor can meet different styles for festival atmospheres, commercial window displays, or home decorations.

-Safety

LEDs for super bright led C7 bulbs generate less heat and are suitable for flammable environments such as Christmas trees.

-Dust and waterproof

The PC shell for super bright led C7 bulbs could resist water and dust, and are suitable for both backyard parties and camping lighting.

-Environment friendly

C7 E12 led bulb is a green decorative lighting, no lead and mercury inside it.
