

Product Description

Fan Blade LED Bulb

LED fan blade bulb has a unique fan shape and foldable fan blades. It has different numbers of fan blades and is divided into one-blade lamps, two-blade lamps, three-blade lamps, four-blade lamps and five-blade lamps. Customers can choose different models according to the size of the room space. This lamp not only looks good but is also very practical, making it a popular choice.

Advantage

- Unique design

The appearance of the fan blade LED light is like a fan. This lamp is rather meticulous in design. It not only meets the requirements of practicality but also can be used as part of the interior decoration to enhance the overall aesthetic appeal.

- Blade folding 90°

Except for the one-leaf lamp which cannot be folded, the fan blades of other styles can all be folded 90 degrees, allowing for safe adjustment of the light emission Angle of four blade led bulb at any time.

- High Lumen

LED fan blade bulb utilizes high-luminosity LED chips for exceptional brightness. Its folding LED bulb design delivers eye-comfortable illumination with extended longevity.

- Good heat dissipation

Modern fan blade LED light utilize thermally conductive PC covers, high quality PCB board, and high-grade LED chips to achieve efficient thermal management. This ensures stable high-brightness output and exceptional longevity.

- Long lifespan

Four blade led bulb with an average lifespan exceeding 15,000 hours, significantly longer than traditional lighting. It is highly durable material and structure can reducing maintenance frequency and costs.

- Easy to install

Foldable fan blade led light bulb uses standard E27 or B22 lamp base, which are very convenient to install and replace traditional lamps.

Fan Blade LED Bulb

		
Blade folding 90°	High Brightness LED Chips	IC Driver

Feature

- ✓ Unique fan design
- ✓ Good heat dissipation
- ✓ Eco-friendly
- ✓ Blade folding 90°
- ✓ Easy to install, E27/B22 standard base option
- ✓ Long Lifetime

Application

Foldable fan blade led light bulb is suitable for indoor and commercial lighting, such as living rooms, dining rooms, bedrooms, corridors, supermarkets, offices, etc.
