

Product Description

Halogen Reflector Bulb

The Todaybulb's halogen reflector bulb is designed to replace the incandescent reflector light bulb commonly used in domestic lighting applications. Energy saving halogen reflector bulbs offer a 30% saving on electricity costs. This lamp has a diffused glass front with different colors, such as clear, frosted, red, blue, green and yellow.

Advantage

- Different size and base cap optional

Halogen R50 bulb is compact, powerful, and perfect for small spaces. With their E14 small Edison screw base, these bulbs are perfect for lighting applications where space is limited, but light output is still essential. Halogen R63 & halogen R80 bulbs feature a larger size and E27 Edison screw base, and provide broad and diffused illumination, for using in larger areas where general illumination is key, combining functionality with style.

- Various light colors

There different colors of glass shell for choosing, including clear, frosted, red, blue, green and yellow, emitting different light colors. The color of light plays a crucial role in setting the right tone for any space. Choose your color, and transform your lighting to match the mood!

- Energy Saver

Todaybulb's energy saving Halogen reflector bulb offers a 30% saving on electricity costs than traditional incandescent bulbs.

- Dimmable

Halogen reflector bulb provides full-range dimming (0-100%), allowing precise brightness control—a flexibility that many modern LED lamps may not offer.

- Long life time

Long life time of 2000hrs, 2 times longer than the traditional incandescent bulbs.

Halogen Reflector Bulb

Glass shell, No mercury

Frosted & Clear glass

Different colors glass front

Warm white light for clear shell

Feature

- ✓ Energy saver
- ✓ Dimmable
- ✓ 100% CRI for Clear & Frosted glass type bulb
- ✓ 2700K Warm white, red, green, blue, yellow light
- ✓ E14 / E27 base cap
- ✓ 2000 hours life span
