

Product Description

R125 full roasted red infrared bulb

R125 full roasted red infrared bulb is a professional bulb focusing on efficient infrared heating. It adopts full roasted red technology and can continuously and stably emit infrared heat. As an excellent red infrared light bulb, it includes power specifications from 150W to 250W infrared heat lamp bulb.

Advantage

- Full Roasted Red Design

Todaybulb's red infrared light bulb treated with full roasted red technology, as an outstanding one among coated heat lamp bulbs, it can effectively focus infrared heat, reduce heat loss, making the heating effect more significant.

- Strong Durability

Todaybulb's red infrared light bulb made of high-quality materials, it has excellent high-temperature resistance and anti-aging performance, can maintain stable heating effect during long-term use, reduce the frequency of replacement, and lower the use cost.

- Suitable for Physiotherapy

Todaybulb's red infrared light bulb can be used as an ideal light source for red heat lamp therapy. The specific wavelength infrared light emitted can penetrate into skin tissues, promote blood circulation, relieve muscle soreness, and provide strong support for physiotherapy.

- Various applications

Todaybulb's red infrared light bulb not only can be used for chickens brooder coop heater, also can be used for bathroom heating, food service, puppy, greenhouses, reptiles and amphibians.

R125 full roasted red infrared bulb

Full roasted red design

Principle

Note!

Application

- Physiotherapy and Rehabilitation Field

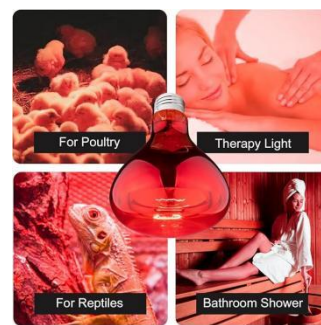

As the core component of red heat lamp therapy equipment, it is often used in rehabilitation centers, beauty salons and other places. By emitting infrared light of specific wavelengths, it helps relieve muscle soreness, promote blood circulation and assist in physical recovery.

-Pet Breeding Insulation

In pet breeding, it can be used to provide a suitable temperature for pet, especially suitable for pets warm in cold seasons, ensuring the comfortable life of pets.

-Industrial Heating

This red infrared light bulb can provide a stable heating environment for small equipment or parts in industrial production
