

Product Description

R39 lava lamp bulb

The R39 lava lamp replacement bulb is designed for decorative lighting like lava lamps and glitter lamps. Featuring 25W/ 30W/ 40W power options, we have E17 lava lamp bulb and E14 lava lamp bulb to fit different models of lava lamps. The 39mm mushroom-shaped reflector (R39) enhances spotlight effects and supports global voltages of 100V-240V.

Advantage

- Voltage-Specific Power Options

100- 120v 30w lava lamp bulb: Optimized for North American/Japanese.

230v 25w lava lamp bulb/240v 25w lava lamp bulb: Designed for European/Australian networks.

30w r39 lava lamp bulb is most common one in the market.

- Instant Activation

Todaybulb's R39 lava lamp replacement bulb reaches optimal working condition instantly upon power-on, activating wax flow within 30 seconds.

No waiting required—enjoy the lava art immediately.

- Dimmable

Todaybulb's R39 lava bulb is dimmable, allowing you to create your desired ambiance and flow speed by adjusting the brightness.

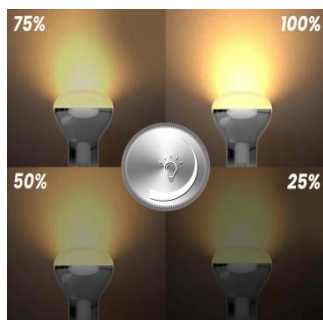

- Safety Certified

Todaybulb's R39 lava lamp bulbs obtained multiple international safety certifications such as CE, UL, allowing you to use it without any worries.
