

Product Description

S15 LED tube

S15 LED tube is a high-quality and high-brightness double-ended LED light strip. S15 LED opal strip light uses great opal PC lampshade and led chips to provide uniform and soft light, which has 211mm led and 284mm led. Tube led light strips feature high energy efficiency, long lifespan, and easy installation, making it an ideal replacement for traditional fluorescent tubes. S15 led tube 221mm and 284mm are suitable for various scenarios such as commercial lighting, home decoration, and display cabinet lighting.

Advantage

- Energy efficient

S15 LED opal strip light consumes less power compared to traditional fluorescent tubes, such as a 4W LED is equivalent to a 30W traditional tube.

- Long lifespan

Tube led light strips can last more than 15000 hours, being over ten times as long as that of conventional light bulbs.

- Uniform luminescence

Using high-quality opal diffusion layer to eliminate LED graininess, the light for S15 led tube 221mm and 284mm is soft, uniform and no glare.

- Easy installation

There are two kinds of lamp base, namely S15 and S15s, which can be easily fit into lighting fixture without wiring.

-Environmentally friendly

211mm and 284mm led light strips are completely free from hazardous materials like lead and mercury, with no harmful radiation emissions.

Feature

- ✓ Opal PC lampshade outside
- ✓ Zero UV and IR bulb
- ✓ Tool free installation
- ✓ Eye-comfort lighting
- ✓ 15000 hours life span
- ✓ Non dimmable

Application

The application fields of tube led light strips are common as below:

- Residential Applications

-Under-cabinet lighting: S15 led tube 221mm and 284mm could emit uniform light to illuminate countertops, offering a brightness environment.

-Wardrobe lighting: Low-profile design for S15 LED ensures seamless embedding.

-Ceiling coves or Vanity lights: High CRI could ensure accurate color rendering of interior finishes.

- Commercial Applications

-Retail displays: S15 LED tube is a clean and safe lighting, reducing UV damage.

-Office ambient lighting: S15 LED tube could offer glare-free lighting, avoiding eyes strain.
